

*If you make the brain waves  $\alpha \sim \theta$  waves*

*Wishes come true*

## “Super Brain 1”

Invented by **【Genius Inventor / Kazumi Masaki】**

"Paramemory/ $\alpha$  Theta" is the prototype

When I was once in charge of practical work at a consulting company that provides latent brain development education (30s), the **genius inventor Kazumi Masaki** It just so happened that my hometown of Okayama was my hometown, so I had a close relationship with Dr. Masaki, and at that time, I often planned his lectures and introduced and wholesale inventions mainly to managers and dentists, and the equipment introduced this time was the **most extreme superior equipment**.

[I once used this device thoroughly]

Eventually, I began to develop **superpowers**.

At the time, I had been selling more than 100 units of this device every month for about two years.

And at the same time as I introduced this device to everyone, I **myself continued to use** this device thoroughly for **about 3 months if I had time**, and one day I suddenly **intuitively felt that I had already graduated from this device**, and I was training at that time in **the O-ring test ( Muscle reflex test)** became more accurate, and eventually this

[Using the O-ring test method to obtain "**information from previous lives**"]

Eventually, I started "management consultation **and life consultation**" as a management consultant.

[Inheriting the design concept here and now and powering up  
The equipment is complete!]

Over time, an acquaintance of mine, the president, improved this device and commercialized it again.

This device was re-debuted under the name "Super Brain 1", and at that time I recommended this device while measuring the brain waves of various people using **an electroencephalogram meter**.

[Suggested retail price] 94,200 yen (10,3620 yen with tax)

Here are some examples I saw at that time:

- [Dentists]

At that time, I participated in an annual academic society of dentists belonging to an academic society called the Society of Dental Oriental Medicine.

I measure the electroencephalogram of the doctors, but the dentist's job is to grind teeth all day with a micromotor (in fact, this device is also an invention of Dr. Kazuzo Masaki) and continue to do very detailed work, which is a very nerve-wracking job every day.

The state of  $\beta$  brain waves is always a state of mind [stress, tension, anxiety].

Therefore, at that time, dentists were all buying this device to take it away.

- [Manager, Certified Public Accountant]

The company owner, who was close to me, purchased this equipment and participated in a golf competition about a month later.

Around that time, he suddenly made a "hole-in-one".

★ When the brain wave changes from  $\alpha$  wave to  $\theta$  wave, it becomes a supernatural state in the world of sports

You can see this kind of ultra play.

- [Famous Qigong Healer]

One time, when I was allowed to measure the EEG of a famous qigong practitioner, he said, "Yes, then I will put energy in now," and when he started qigong treatment, the brain waves suddenly became  $\theta$  waves.

- [Super Psychic/Koun Yamauchi]

Mr. Koun Yamauchi, a super psychic who took great care of me at that time and greatly influenced my life (fate) after that, was accompanied by Amaterasu, understood all kinds of things, and was given all kinds of power, but one time when I measured the brainwaves of the teacher, he always maintained  $\alpha$  waves even if he was talking to me normally. The moment he said, "Then I'm going to call God now," his brain wave got a  $\theta$  wave.

★ Looking at the brain waves of these two people, **I thought, "Well, to demonstrate superpowers, I need to make brain waves a  $\theta$  wave !!**

And then, as I mentioned at the beginning,

**As a result of using this device thoroughly for about 3 months", my brain waves "becomes  $\theta$  waves instantly" and I eventually can perform past life therapy.**

## Mind Fitness Co.,. Ltd.

[Back side]

“Super Brain 1” is **recommended for such people**

- High school and university entrance exams / Various **qualification exams (improve memory and concentration)**

- Manager (I want to learn **floundering** and **intuition**)

- Excessive **stress or poor physical condition (fatigue, anxiety, tension)**

- As a tool **for developing latent brain power**

(**Wish fulfillment, meditation, chakra opening, qigong treatment**)

- Those who want to acquire **psychic abilities (psychic powers)**

- ★ For **relaxation** during **detox**

\* **Even if you detox** with the detox machine "Super-Foot-Cleaner "

As a measure against those who end up remaining transparent

(**Releasing the tension in the mind makes it easier to detoxify**)

## Mechanism of Super Brain 1

"Super Brain 1" is for left ear (151Hz) and right ear (2~9Hz lower frequency) By listening to **two** types of sounds, the right and left brains work at the same time, and the **frequency difference at that time is perceived as a buzzing sound, and the left and right brains work to**

balance naturally, resulting in  $\alpha$  waves of the brain [relaxation & concentration].

- It is a  $\theta$  wave [super relaxed] state.

読書・勉強・パソコン作業  
しながら聴けば OK! お手軽です!

## "Super Brain 1 " realizes $\alpha$ - $\theta$ brain waves

EEG type/mode	State of consciousness (mind)	Purpose of use
$\beta$ wave 13~30Hz (Beta)	Nervousness, anxiety, irritability <b>Stress State</b>	
<b>First <math>\alpha</math></b> (11~12Hz)	<b>Tense &amp; Focused</b>	
Mid- $\alpha$ <b><math>\alpha</math> wave Mode 4 (9Hz)</b> (Alpha)	<b>Relax &amp; Focus</b>	Studying, working <b>Sports Training</b>
8~12Hz Slow $\alpha$ Mode 3 (7Hz)	<b>Slightly sleepy / decreased consciousness</b>	Stress relief Immunity boosted
<b><math>\theta</math> wave</b> : 4~7Hz (Theta) Mode 2 (4Hz)	Light sleep state <b>Super relaxing,</b> <b>Meditative State</b>	Spiritual stability Learning & Memory Wish fulfillment and image power intuition, inspiration Meditation Training Qigong Treatment Contact with God/Spirit Body (Demonstrates superpowers)
<b><math>\delta</math> wave</b> : 3Hz or less (Delta) Mode 1 (2Hz)	Deep sleep / sound sleep Growth hormone secretion	<b>Insomnia</b> <b>Poor health</b> <b>pathological condition</b>
